MODULE 4

Synchronicity

KEY TAKE AWAYS:

- Synchronicity = clearing, calculating/assessing, and creating.
- There's many parallels between manifestation & Feng Shui.
  - Space clearing = symbolic of mind clearing (inner home)
    - Tools: worksheet from week 1!
  - Space design = symbolic of calling in what we want (outer home)
    - Tools: Feng Shui fundamentals (9 stars and 5 elements, below).
- Just as how you must **first clear** your space before decorating, you must reach **emotional neutrality** before "manifesting."
- Consider Feng Shui a 3D visualization process. Do NOT get caught-up in the technicals of various Feng Shui methodologies. No one knows the exact history+all the nuances - always lead with your INTENTION first.
- I like to use Flying Star Feng Shui, which uses time dimension (9 star ki)

CLEAR, CALCULATE, CREATE

Hint: Just as how there are "malefic" or "unhelpful" energies that distract your mind (news, people, negative thoughts, etc.) there are also "malefic" energies environmentally & geographically. Many astrologers & metaphysical experts calculate these energies and publish them annually/monthly/daily (aka 9 stars.) That's why it's good to re-do the Feng Shui annually.

1

CLEARING YOUR HOME CHECKLIST

- Salt water jar
  - Typically I had salt water jars in stars 2, 3, 5, 7 because they are "malefic"
  - Fill 1/3 glass jar with salt, add 6 coins, and add water to the top.
  - Add water after evaporating. Throw away the whole jar at year-end
- Add house plants
- Air your home or get an air purifier
- Add water filter / drink clean water
- Get good natural lighting
- Reduce noise
- New mattress+furniture
- No mirrors in the bedroom
- No electronics in the bedroom
- Steer away from toxic cleaning products

CLEAR

- Check out this video for detailed instructions on salt water jar.
- Also continue to utilize tips from week 1 worksheet.

2

9 STARS FOR 2025 (LO SHU SQUARE)

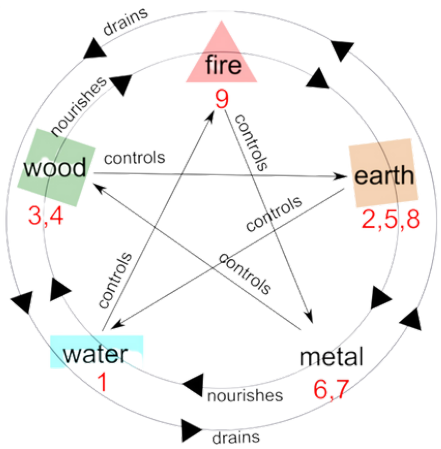
south east	south	south west
1	6	8
9	2	4
5	7	3
north east	north	north west

CALCULATE

- Numerous astrologers publish annual star locations. All you have to do match them with your home map.
- See next worksheet.

3

5 ELEMENTS



CREATE

- Lots of Feng Shui experts will recommend buying certain items to decorate your home. This is unnecessary. Learn the element relationships, and use what you have to "fix" your home.
- Notice that the 9 numbers have designated elements. I.e., water = 1, metal = 6,7, etc. This is the most important piece to know.

MODULE 4

Synchronicity - Continued

KEY TAKE AWAYS:

- Feng Shui literally means Wind & Water. It's the art of harnessing environmental energies for the betterment of human lives.
- "Fast food" or DIY fengshui generically divides up one's home, but there's several things to consider before assigning elements!
  - #1. House direction (you should have this already from pre-work)
  - #2. House period (read about the 9 periods here)
    - Some look at the year the house was built OR the year one moved in. I use the latter methodology.
    - Meaning, I use **period 8,** which started from February 5th, 2004 and will last for 20 years to February 4th, 2024.
  - #3. Annual 9 star movements (published annually by Chinese astrologers)
  - #4. Measure at the elemental relationships between #1, #2, and #3.

YOUR 9 AREAS

Determine the elements in each corner.

#1. Your home period

Write in each square what corner of the house this is, and which numbers go inside (see right)

#2. 2025 Annual Star

south east	south	south west
1	6	8
9	2	4
5	7	3
north east	north	north west

PRO-TIP

- Because there are two stars (or three, if you add personal Star Ki number) in each corner, sometimes they can be contradictory. For example, in the above example the NE corner has malefic number "2" and benefic number "9." Your job is to add elements that amplify the 9 (fire), or at least reduce 2 (earth).
- I often refer to Feng Shui experts who give their own interpretations and recommendations. My personal favorite is Picture Healer.
