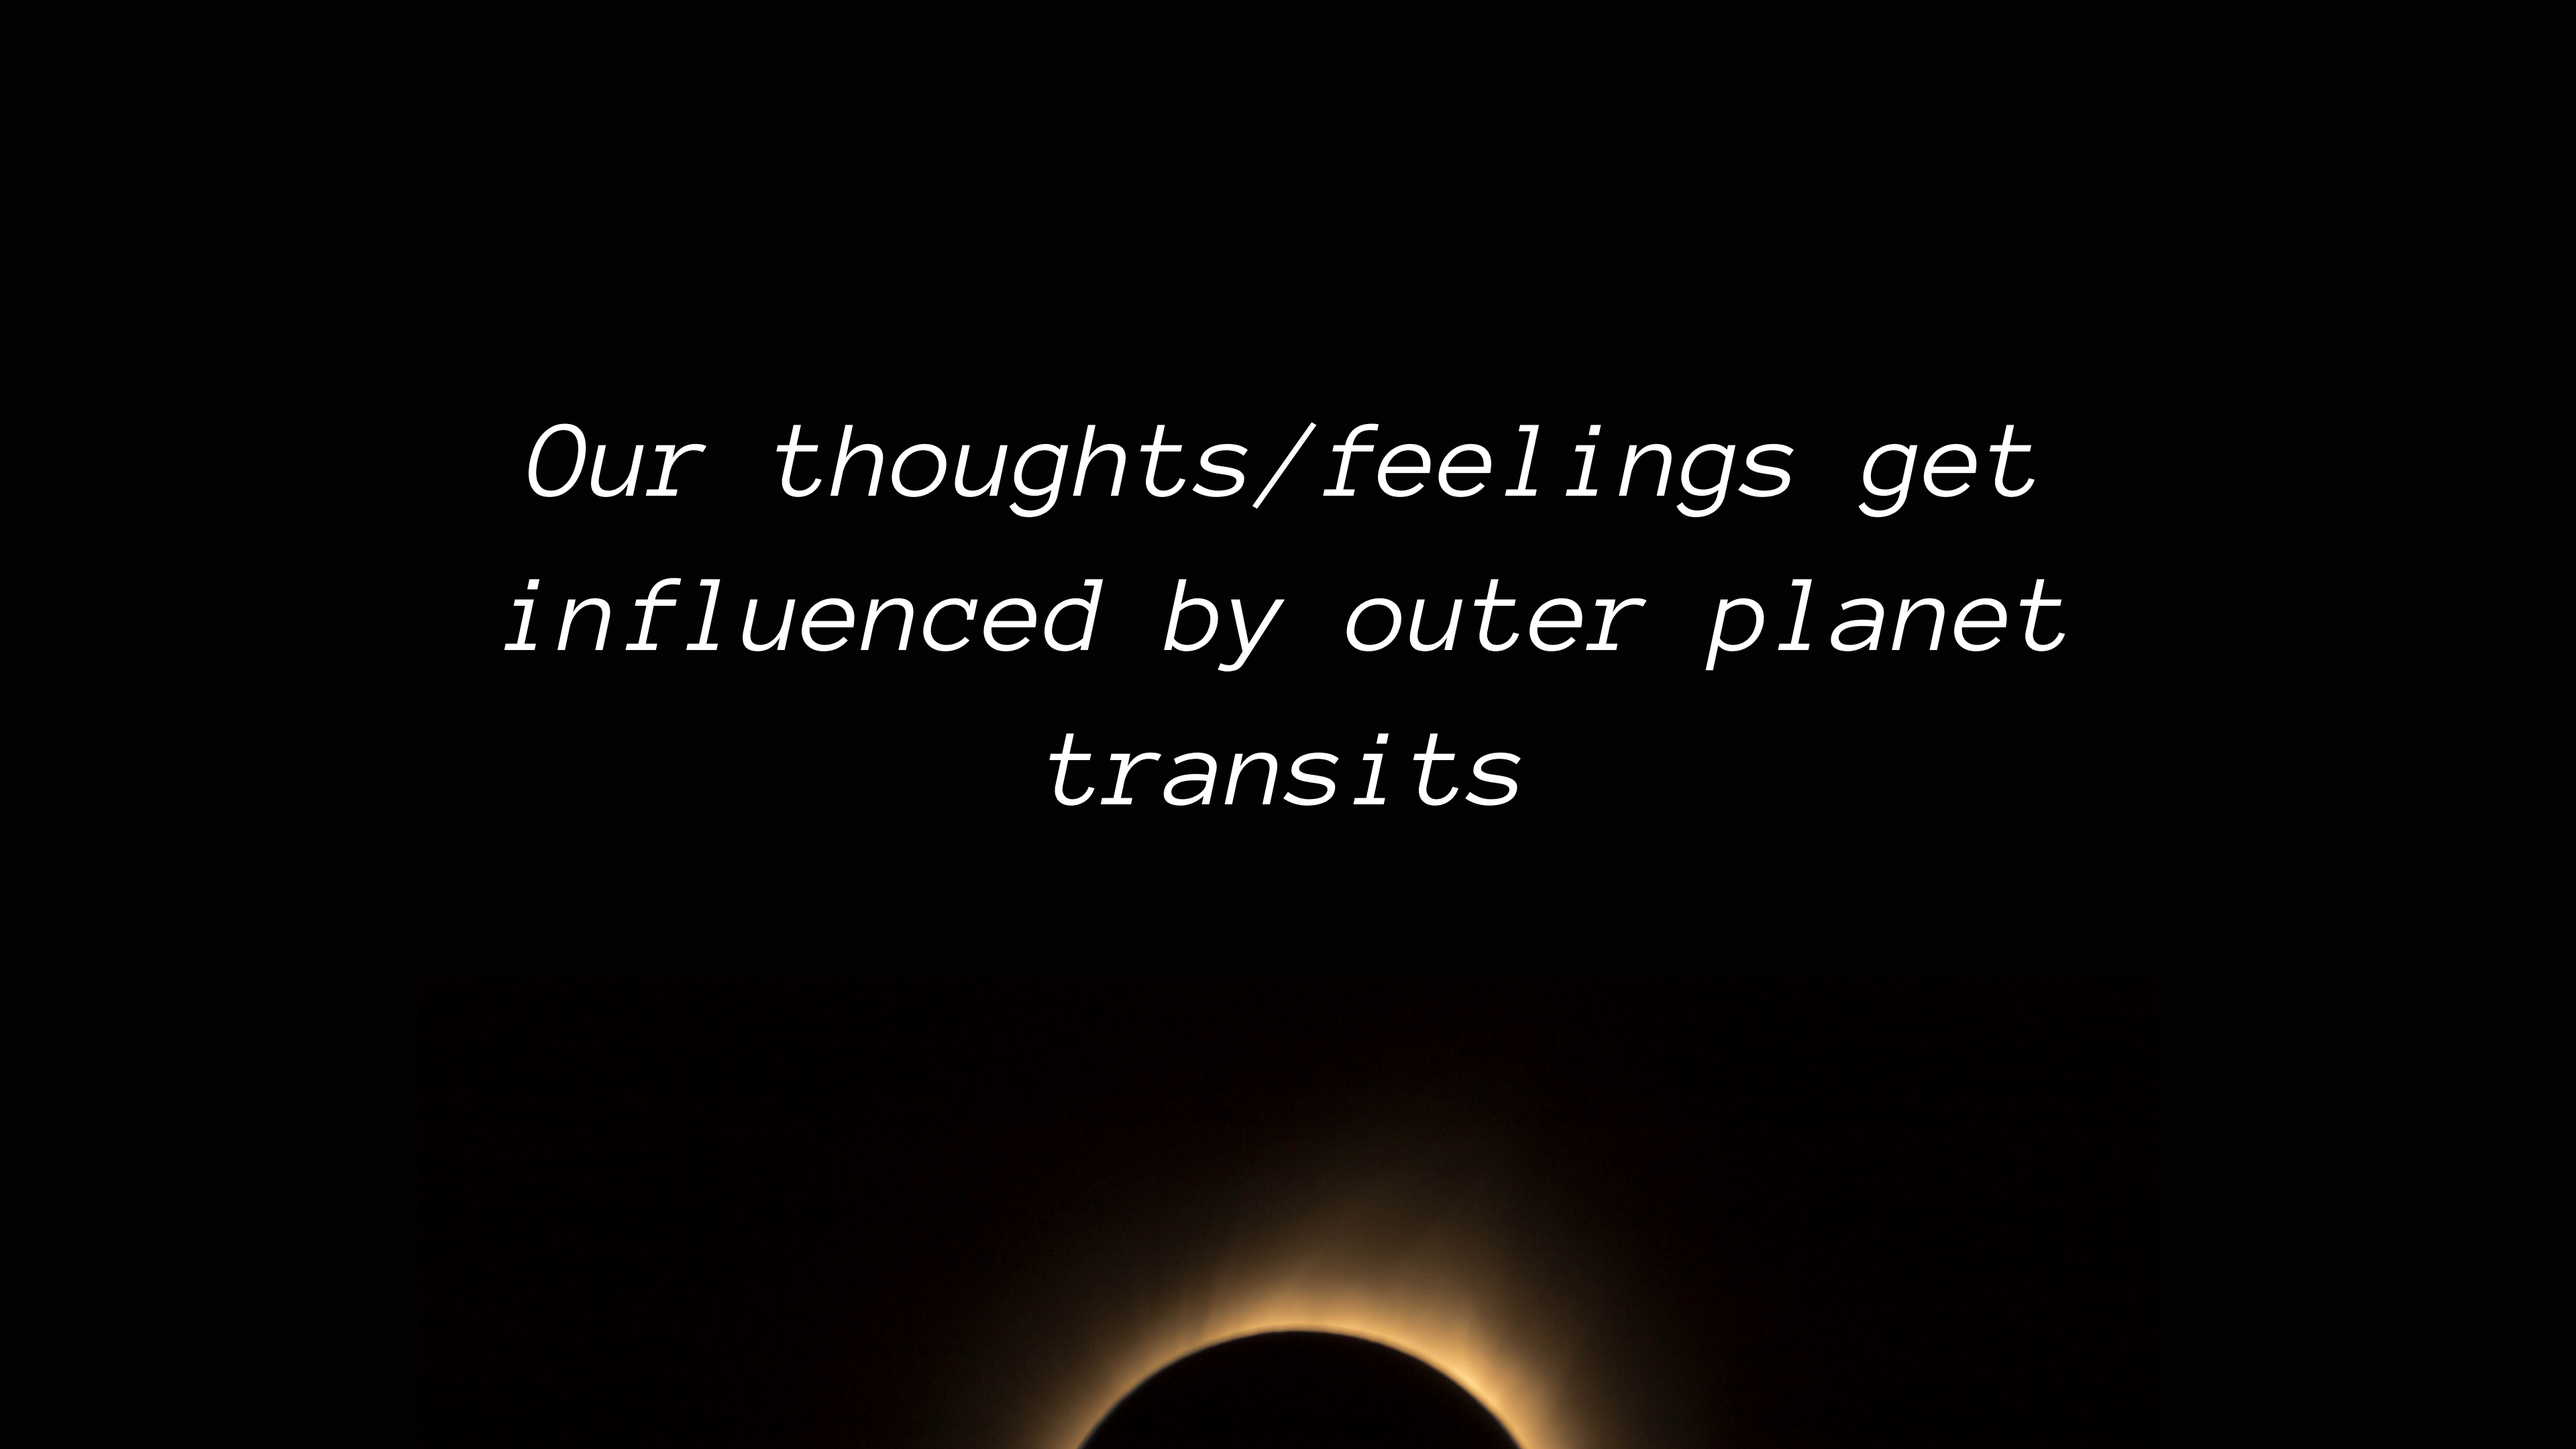
Our thoughts/feelings get influenced by outer planet transits



We can use the information from these tranists and transmute the energy to reach the penthouse in 3 steps:

identify

Identify your behaviours and programming.

reflect

Reflect on the origins of your beliefs & values that related to your behaviours.

transmute

Change your values & behaviours to help you align with your vision of the penthouse

IDENTIFY

outer planet transits

Our life’s focus & challenges changes as outer planets transit new signs. Becoming aware of these transits & our challenges is the first step to transmuting.

Outer planet transit themes

Pluto is ultimately is about destroying what was programmed into you to set you free. Pluto is deprogramming you. Asks you to go deep and reflect.

Neptune puts a fog infront of us, but it can make you really creative, you can be too optimistic about themes of this house.

Saturn's gives you lessons to help you learn to setting boundaries and mastering lessons like responsibility, structure, maturity.

🏠	Pluto as it transits the houses	Neptune as it transits the houses	Saturn as it transits the houses

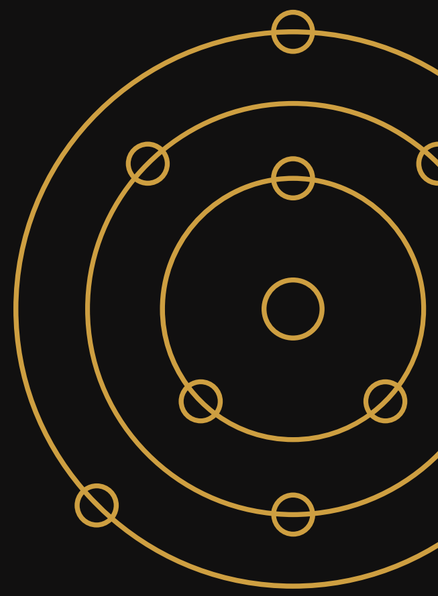
3, 7, 11	Communication breakdowns, relationship power struggles, social group transformations	Mental fog, relationship illusions, idealistic but unrealistic social visions	Communication obstacles, relationship commitments, social responsibilities
4, 8, 12	Home and family upheavals, deep psychological transformations, hidden power struggles	Family illusions, spiritual confusion, escapism tendencies	Family burdens, psychological limitations, isolation

the second step to transmuting is reflection



Looking at your Capricorn & Pisces houses:

- **Pluto**: Where do I win & lose?
- **Neptune**: Where do I keep getting tricked?
- **Saturn**: Where am I gaining mastery?

Ask yourself:

1. What experiences have you been through in these houses? (planetary influences)
2. What are your values & beliefs? (programming)
3. What are your behaviours/self talk as a result of this?
4. What is the gap between where you are now and the penthouse?
5. What do you need to change to move to the penthouse?

By identifying our programming & influences in these houses, we can begin to understand what is keeping us from reaching our penthouse.

the third step to transmuting is **change**

Change happens in 3 key ways:

mindset

your energy, the way you think & the way you speak

behaviour

how you act

environment

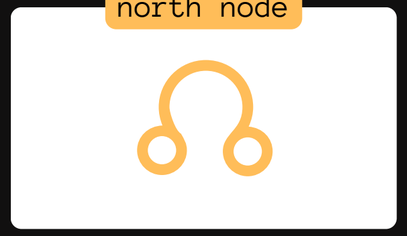
who and what you surround yourself with

the third to transmuting is change

Use these two placements to guide you through outer planet transits:

1. **sun gate in your human design**
2. **north node in astrology**

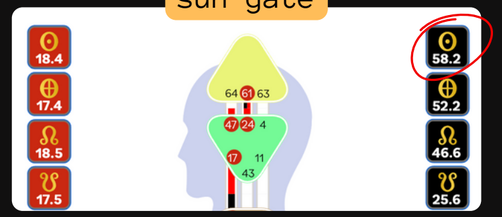
north node



The current North Node house transit encourages you to borrow the lessons from challenging transits to work through them.

Your North Node will allow you to find clarity, purpose and wisdom through challenging transits.

sun gate



Your Sun Gate offers a unique advantage allowing you to navigate this journey with your unique gifts & strengths.

These gifts will allow you to find structure, see through the fog and take back your power.

the third step to transmuting is change

What house is Aries in your chart?

The North Node is currently transiting **Aries**. It will next move into Pisces early Feb 2025.

The current North Node indicates a collective **direction for growth**. Use this to understand what area of life you're encouraged to open to receive. This is where the universe is asking you to s**tretch beyond your comfort zone.**

Your sun gate will remain constant. But, the process embodying it takes time.

Your **sun gate** is part of where your incarnation cross comes from.

Connecting with people with similar incarnation crosses, or using books or other resources will help you develop a better understanding of this over time.

Focus on small tangible changes you can make using this information to move towards the penthouse

You’re ready to transmute.
