All right. So good to see everyone. So, so, so good to see you. Um, okay. This is not something that, uh, I'm ready to talk about yet, but, um, sometime down the line I do want to talk about, and I think Katie kind of got a heads up on this. I do wanna talk about curses and spells in witchcraft, not in this cohort, but, um, just, I, I'm just curious if anyone is familiar with that at all.

If you've like, ever studied it, heard of it, worked with it, you've studied a danya

Well, like in Mexican culture, like we know a lot about purses and, and like getting a cleanse, you know? Yeah. Did you actually like practice it yourself or No? No, I didn't practice it. I just would, I would hear a lot of stories of like what to do and what to like, how to cleanse yourself and stuff like that from curses.

I've heard really scary stories from friends where they've been like, cursed really bad, and I'm just like, wow. Do they often know who cursed them? Yeah. Wow. Yeah. Small town though, you know, like I would tell 'em, I'm like, wow. I don't know. Yeah. I mean, I, I've been taking some time to do some research and study and I feel like it's, it's real.

I mean, o obviously it's real, like we're always setting intentions, right? And that could impact other people, but, but something like a witchcraft I think happens at a much, much bigger and more serious scale. So. I mean, you guys know that I'm always interested in like finding new ways to, you know, change our lives and shift our reality.

And that is like the last frontier that I haven't touched, really, mainly because I just didn't want to. But I am coming across a lot of information that it's, it's probably real. So it, it's almost like even if you don't do anything about it, there could be other people throwing spells on you. That's the bigger issue.

There could be generational stuff. What about you, Marilyn, that, do you have any familiarity with this topic? Uh, yes. Um, I have a few friends who were involved in, um, Sania, which is, um, sort of, well, I guess a New York thing. And, uh, so I, I've gone to a couple of ceremonies with them and, um, I found it fascinating.

You know, I didn't, I didn't get into it, but I was really an observer there. And, um, uh, there's really something to what they're doing. Were they casting spells on someone or was it more like worshiping the goddess behind it or, um, there were a couple of ceremonies where they were removing curses from people, so it was a good, good ceremony.

Yeah. Uhhuh. Yeah. I I never saw any, um, like black magic or anything like that. And once they do the whole curse removal, does it get better? Like, does it improve whoever got it removed from, you know, I, I was never there to follow up on the people that were involved. I was just watching the ceremony. Um, I assumed it did, but, um, I, I, I never followed up, but, but it was, it's just like the whole atmosphere, you know, with the drums and, you know, all the music and everything else going.

It felt very, the air was very heavy. Mm-hmm. Mm-hmm. Yeah. For sure. Interesting. Um, yes, I heard that San Santoria is huge in New York, New Jersey. Yeah. Brooklyn. It's crazy. Florida too. So, yeah. Um, scary stuff. What about you Katie? Um, I mean, just kind of what we've talked about a little bit. Um, hearing that a family story and I actually, I went back to my mom after we spoke and kind of had her tell me the exact story.

Um, and you know, it was like my great, great great grandmother had a son named Lester and he got really sick and someone was told her to like boil his urine with a pin in it, but don't boil it dry. And someone will come to the house and ask for something and that's the person that like did it. And that happened I guess.

But then. Lester had a son who died in an accident. And then my great-great-grandmother had, my great-grandmother had a son who died in an accident. And then my grandfather had a son who died in an accident. And my mother had a son who died in an accident. So, I mean, that's a lot of coincidences, but yeah, that's like a pass down curse, essentially.

Like a pass down family curse. Yeah, I mean, like I said, I'm just kind of getting into it like reluctantly, like very reluctantly and I'll, and I'll, you know, it's gonna kind of bleed into the whole Neptune transit 'cause Neptune is entering my, uh, eight house, the, the psychic house of Aries. So maybe I'm being kind of forced to open my eyes to new tools of the occult against my will.

Um, but, uh, but. You know, I mean, I'm Korean, Korean shamanism is like a really, really, really big thing. And I've seen growing up, like I've seen fam family members get really, really sick and the doctors didn't know what was wrong with 'em. But they go to a shaman and they get healed. Like, I've seen that. So I know there's something to it, and I know it's real, but for some reason I've had personal blocks around it where I just don't want to talk about it, don't want to touch it.

I don't wanna believe in it. You know, that's why I stuck to like numerology and like astrology, like very objective. Not, not even objective, but like, there's like a detachment with these things, right? It's just happening. It's in the sky, whatever. Um, and now of course I talk about homes and feng shui, but people's energy and intention is, is also like a really real thing.

So I've been working with, um, like some Vedic priests who specialize in like, uh, curse removals and witchcraft removals. And he, they flat out asked me, they were like, how do you help your clients if, if none of these things. Do it for them. Like if the home, the feng shui, the atrophy, if it, if it doesn't help them, then what do you do?

And I was like, well, I mean, that's kind of where I stop with that. I don't really go much deeper. And they're like, maybe the next step is to talk about curse and witchcraft. Even if it makes me uncomfortable. Maybe that's something that they need, you know? So I'm like, uh, it's just something I'm like playing around with.

But the bo bottom line, I think it's real. Like I actually heard a lot about Santeria even before this call. And, um, it's, uh, yeah, I, I just can't believe people actually spend the time to do animal

sacrifice and shit like that. Like, I don't get it. But maybe that's because I, you know, I live in America and like in California and don't really think about these things very much.

And spirituality here. The new age stuff is very different from like, um, stuff that originates from, uh, like, you know, like colonialism or like, you know, from like deep like ethnic culture. Like that's very different. So maybe there's like a, maybe there's something in my brain that's refusing to accept something that's true because I personally don't wanna face it, you know, 'cause of my own history or whatever.

But just wanted to plant that in your head because that might be something I talk about in the future. Um, and it also wanted me to talk about this with you guys too, because I was like, well, they're probably here in this class because on some level they know there's this crazy force that's ruling them, right?

Like, doesn't mean there's a curse, doesn't mean there's a witchcraft, but I'm just saying you're probably here because you're also feeling something you can't explain. And, and I think that's the whole point of, I, I would even argue if you live on a Saturn line, you feel cursed. So it doesn't really matter where it's from.

The point is you feel it and something needs to be removed. Um, anyway, if there's any other thoughts on that, let me know, but I just want to take a quick poll.

Okay. Everybody has their, um, astrology chart. Keep it at whole sign, please. Yeah, I realize that I've never done whole sign. I've always been

Yes. Keep it a whole sign. Also, raise your hand if you had a chance to talk to Hannah. I know Adonia did. Marilyn, have you spoken to Hannah? No. Okay. Not yet. All right. Katie and, and Marilyn? Yeah. If you guys can go ahead and, um, grab some time with her, that'd be really great. Okay. Any other one-on-ones you guys have had, whether it is with Alana or Genevieve?

I've met with Genevieve. I'm meeting with Hannah tomorrow. Very nice. How was meeting with Genevieve? It was great. She's so sweet. Um, it was really interesting and she gave me some homework to, to work on as well, so. Okay. Wonderful. What about you, Marilyn? Um, I met with Genevieve and, um, the discussion wound up being about family and the problems I had with my family and, um, you know, I also got some homework, which I attempted to do very hard dealing with family.

Um, but, uh, I have a father who's 95 and, uh, I have a sister that takes care of him, so I, um, travel to take him out like every three or four weeks. But the sister who takes care of him, we're really not on good terms. So, uh, you know, from that comes a whole lot of other stuff, including what happens when he's not here, so.

Mm-hmm. Mm-hmm. Yeah, we spoke about that a lot. It, does it feel like at least the session with Genevieve touched on some stuff that you felt like needed addressing, whether it's on a

physical level or emotional level? Yeah. Um, you know, basically it comes down to money. Because of his situation, she's being left, everything, and myself and my younger sister are not being left anything.

And so Gen Genevieve was suggesting that we, you know, deal with it now because my youngest sister has a lawyer and is ready to go to court as soon as he's gone. So she was suggesting we start dealing with it now and not, you know, wait, because, you know, court situations can be very lengthy and cost a lot of money and might not, and probably will not be worth it in the end.

Mm-hmm. You know, so I had, I guess I avoid a lot of things. That was something I really wanted to avoid, uh, discussing it now and, uh, you know, even when he is not here, I, I, I was just ready to leave it alone, but, you know, she was suggesting that I, I not do that. Yeah. Hopefully she gave you some empowering exercises to help you feel more confident when you talk about these things.

Mm-hmm. Yeah. Yeah. Um, yes, I completely understand how sensitive and delicate that situ situation may be. Um, I bet, I bet some of the stuff that we're gonna talk about today might address why that's happening right now. Mm-hmm. So, so, uh, if you guys can like, quickly shout out your rising signs. I'm a Pisces Rising Pi sees Leo.

Leo. Oh, that's right. Okay. And

what about you Marilyn Capricorn. Aha. Bingo. There it is. Okay.

I don't know if you guys have seen this before, but please open this Google doc that I just put in the chat. Okay. So, um, this class is all about transmutation. What are we transmuting? We're transmuting some heavy, heavy, heavy energies. That have been created in your life by planetary transits? Um, I'm, uh, I'm bummed out for other people who are not here today.

'cause this is probably more, more of the more important classes. I mean, the feng shui, whatever, that's important too. But this is like one of the more impactful ones. So happy you guys are here. So Pluto was in Capricorn for the last 20 years. As you guys know. Now, every time the planet shifts, the next transit is built on top of your previous transit.

So the lessons that you've learned in the last 20 years. So for example, Marilyn Mari, Marilyn is Capricorn rising. Pluto was transiting her first house for the last 20 years. So let me actually. Also give the Pluto one too. So Marilyn, the success of the next 20 years for you is kind of dependent on the lessons that you've learned mm-hmm in the last 20 years.

Just stay tuned. Let me so actually open this first. You guys just go there. And so for Marilyn, it was her first house for Katie. It's her 11th house, right? Capricorn's, her 11th house. And for Danya, it was her sixth house. Is that right? I think it was your sixth house. Capricorn's her sixth house.

So I want you to quickly scroll through. This Aquarius, sorry. Capricorn cheat sheet.

So, for example, with Marilyn, her first house, her, the biggest theme there was becoming powerful in herself and becoming respected in her field, and disciplined, developing a strong, authoritative presence in whatev in, in whoever, through whatever. Because first has a house of self. Um,

I know a lot of Capricorn risings through hero's journey, through artist, way through business growth. It, it was, they, they were just locking to me. Why? Because they felt like everything was an uphill battle. When Pluto was going through Capricorn, the first house. Every, everyone feels like oppositional to you.

Everything feel ev everything. Like you'll eventually get what you deserve, but man, you felt like you had to jump through hurdles to get there. That's kinda what it felt like.

Um, for Katie for the last 20 years. There were big lessons around.

I mean, if you kind of cut through the fluff of the description, what it really boils down to is, uh, did you feel like you could really stand out from the crowd, your community? Like, do you, do you feel like you could, um, be a leader within your community?

I also feel like, um, I don't know if you felt like people were difficult at all within your world or your network, Katie, like initially, like you become really good friends, but then over time you kind of realized like, ah, this is too much for you to handle.

I think in, in work, I, I think. And in the last 20 years? Yeah. I mean, I've gone through a lot of, a lot of life changes, you know, from adolescence into adulthood, college, into my first professional career, moving across country by myself, making like, yeah, finding my people. I guess maybe it's been really hard to find like my tribe and to, to create and keep your boundaries.

Yes. For some reason, with the Pluto through Capricorn transit boundary was a really big theme no matter what house it's in. Um, and becoming powerful. Remember Pluto is going to make you more powerful, but you have to, you know, work with it, right? So for example, when Pluto transits your fifth house, you'll become really creative, but you have to produce the work of art.

You can't quit if Pluto transits your second house, which is about to happen to Maryland by the way. Aquarius, right? Aquarius, that canal. Plu is about to enter your second can house. You will become very wealthy, you'll become very affluent. But you have to work with Pluto. You have to step up to the occasion.

So for example, when Genevieve told you to ha to tackle it, now that's actually kind of good advice. It, it, not hiding, but being front and set and tackling things. 'cause Pluto is, is a

destroyer, right? Destroys everything in its way. So you have to let it do its thing and work with it instead of hiding from it.

Um, for Adia sixth house, actually, I'm really curious how it played out for you, Adia. I feel like maybe you became, um, really disciplined around health. Um, work routines work is a big thing. Maybe you became more regimented around your daily day-to-day structures. How, how do you, how did the Pluto Transit in your six house play out?

Or it's for Leo Rising, right? Yeah. So for the last 20 years, um, discipline wise, I don't, I think that's where I struggle a lot. Um, we're, after talking to Genevieve, actually, me and Fatima got on a little health journey and we've been waking up at six in the morning to go work out. She's also had some health issues, so, um, I took a lot of what she told me, um, more serious because I felt like I could feel not being routine, like affecting my life and affecting my, my body and my mental health.

So I know it's, it's definitely kicked me in the butt. Yeah. Not being routine. Yeah, but you also got really invested in your job, right? The, the sales job. You, you've, so, okay, so Pluto is all about achieving mastery. If it translated your second house, sixth house, 10th house, you achieve mastery in that realm.

So Danya, you became a really good salesperson. Mm-hmm. That's kind of how I see it. Um, for, for Katie, I mean, any, anytime Pluto trends, your first house, 11th house, which was Marilyn and Katie seventh house, um, you become better at handling power dynamics in relationships. You may not like it. At least you'll become very aware of what that's like, what that part dynamic is like.

So aia like, um, when I first spoke to you and when I started working with you, the first thing that I got is that you're actually incredibly disciplined. You're incredibly ambitious. I think that's the whole Pluto going through your sixth house thing, you know, you didn't like mess around like your peers and went down all these rabbit holes being distracted, like in you're, 'cause you're still young, like you focused on, you know, getting that bag.

Mm-hmm. And like getting that promotion rising the ranks. That's very Pluto going through a sixth house story. Did you have any major illnesses by any chance? This car accident? No. My car accident two years ago. Um, and I still feel that this up to today, just, and that's what I talked to her is like I have a lot of back issues, lower back issues.

So, um, I told her that when I got in the car accident, I felt like. Because I was stomped, I felt like I needed to reevaluate what I was doing and take it more serious. So like, if I was gonna stay in car sales, like I needed to really stay disciplined and really like go there to work versus go there to chitchat and make friends and, you know, just stay stuck in the amount I was making.

Right, right, right. That makes a lot of sense. Um, so, so I want you guys to take a moment to kind of like write down, before we start sharing, write down what were your biggest lessons, you

know, from that Pluto Transit in your houses. So from Marilyn in your first house, and Katie and your 11th house Adia and your sixth house.

This is important because you're gonna take these lessons with you in the next 20 years.

And in this process, I also want you to write down and acknowledge how difficult it was. You know, think about the first few years, like what were the challenges you ran into, you know, um. Just think back to the moments when you felt like, man, I don't know if I can do this. Write all those down.

Now that you are on this call with me and we're talking about the purpose of Pluto. You're gonna be better prepared for the next 20 years. 'cause you're probably gonna look back and go, oh shit, I didn't realize I had to do this, this, this in my Capricorn house. Right.

Marilyn is smiling.

Okay. Can you hear me now? Yeah. Um, when, I guess when the transit first started, that's when I, you know, lost my job. And, um, you know, it was, it was on unemployment for like, for like two years. It was very difficult to get a job. You know, money was very hard to, uh, to come by And, um, you know, I had a house and the mortgage, the whole nine yards and I didn't wanna give it up.

So I was, you know, scraping to get by. Um, I did get a real estate license, and that was the beginning of learning boundaries. Um, I had some problems with some of the people I was working with, and that's because in the beginning I didn't set boundaries and I always felt that they were infringing on my time, you know?

And, um, that, that, that was a really big thing. I, I always found myself getting angry or getting tense because people thought I was a pushover and were always coming up to me, you know, can, can you do me a favor? You know, can you go like 40 miles out of your way to show a house? You know, things like that.

Wow. Mm-hmm. You know, and also I had the same problem with my family. It was, you're not working, so now you can do this. You can do this. And, um. I guess sort of, I'm like a caretaker in my family. And I did wind up taking care of an aunt who had Alzheimer's. And the time when I first went, my mother asked me to go and help her.

She just said she needed some help. And when I got there, I found out she had Alzheimer's and no one knew about it. And I wound up being her primary caretaker for two years. And, uh, you know, I couldn't get anyone in my family to help me, but I, and I felt so, like, I could not, um, not help her. So, you know, I felt that I was, uh, I guess learning, when I look back on it, learning to set boundaries.

You know, I, there are things that I know I should have done when I first. My assignment to take care of her. And, you know, as I went along the way, I learned, but in the beginning I really got dumped on. So, um, you know, I think learning boundaries has been a big lesson for me. It's interesting that you mentioned that because every, everyone I know who was like, basically cap rising, um, it, it manifested as, so your h your first, your first house is the house of self.

Your seventh house is, is the house of the other. So if Pluto was transiting your seventh house, it's other people trying to pick fights with you. Um, or, or dealing with very controlling people. But when Pluto's transiting your first house, it's almost like, um, it's like a weird warp where it's still other people trying to control you and tell you what to do.

Mm-hmm. But it's only because they think you are being difficult. Mm-hmm. It's kind of meta, so, yeah. So for example, them telling you like, well, you don't have, you don't, you're free right now. You don't have any job right now, so just come do this. Right. It's, it's completely a projection of what they think you're going through.

Right. Um, so there's like a slight nuance between like the first and the seventh house transit with Pluto. But what I'm also hearing Marilyn, is yes, there was some boundary stuff, but also, um, just because I know a little bit about you based on what you shared with me, you've established, you've proven mastering so many different fields over the last few years, that hopefully what you've also gained from this transit is the confidence that you do deserve what you deserve.

Mm-hmm. Mm-hmm. You deserve the reward, you deserve the recognition you deserve, you know, whatever it is your, your, your, your father should give you period. You know, so when, so when Pluto goes to your second house, I mean, we will go through the Aquarius houses too, but when Pluto goes to your second house, hopefully you have the conviction and the confidence to fight for and ask what it is you need.

Because the first house transit showed you that you deserve it. You right yourself through caretaking your, and you've proven yourself through the arts, the legal field, all these different things. Because let me tell you guys something, Pluto also can make you deeply insecure. So all the thing, all the transits that it just left, just, you know, just went through in your houses.

If you didn't really pay attention, it could also make you very like questioning yourself, right? Because it destroys everything. It can also destroy your confidence. So you have to trust that you learned what you did and you've mastered it. So, I know this isn't, maybe not applicable to Adonia, but in a perfect world, a, a really good Pluto transit through a sixth house, you come out stronger, you come out cancer free, you like beat that monster.

Health wise, you really master your work routines. Um, and because it's in Capricorn, it's also about proving yourself to authority. Like you've gained respect from your superiors, you've gained respect from your, whatever your boss, uh, is for Katie, gaining respect from your peers, from, um, maybe you have like a really great LinkedIn profile.

I don't know, because 11,000, the internet,

it's different if it was any other sign. But because it's Capricorn, there is like a hierarchical nature to it. Mm-hmm. But, um, but Marilyn like that, yeah. Everything you shared, uh, checks out. So do you feel like. Do you think it can extract some things you've learned beyond just the boundaries? Do you think you, you have a, like, like some things you've extracted from the last 20 years that you feel like are valuable to bring with you in the next 20 years as now Pluto's about to go through your money house?

Um, I've been looking toward entrepreneurship instead of working in, you know, a, a regular job. I mean, I work from two o'clock to 10 at night, so that's my like nine to five job. And, um, since I was young I was always told that's the only way to make money. And I, I feel that, uh, I'm strong enough to be able to, you know, make money being an entrepreneur in, you know, real estate or, uh, you know, I think we talked about the Airbnb.

You know, I've been looking to, um, buy land and maybe build something, a duplex. I love that. That's, um, sort of what I'm thinking of. And um, so, and you know, and I would be not in a, a corporate situation, which is what's been my fallback for like, the past 25 years. Yes. I'm glad you're bringing this up. When Pluto Transits second or eighth house, or, or if you have Pluto in the second or eighth house, natally, this is someone who, uh, needs to have passive income or, you know, um, I try not to talk about this too much because it can get really dicey, but yeah, if you have Pluto in the eighth house specifically, um, you'll be good at crypto, you'll be good at trading, you'll be good at anything like, you know, quick money, like speculative things.

Um, based on my discussion with Marilyn, I think I, I think that there's definitely something there with Airbnb, and I know you were interested in. YouTube, I actually think whatever you put on the internet will have more to do with your home, your your homes. Mm-hmm. Because Aquarius is rules technology and the internet, it's in your second house, so there's, so there's something there with making income through the internet.

Right. Um, but I think you also had all these tourist placements too. So to me that all points to real estate. Mm-hmm. Which is real. I like that. I like the idea of you buying land and, and uh, building stuff on it. That's really cool. Mm-hmm. So what that also means is, um, not being afraid to let go of your old identity.

Yeah. In terms of how you used to make money. That scares me. You know, it's like I don't wanna let it go and move on because Pluto will challenge that. It'll be like, well, you know, you might get another random corporate gig offer. You have to be disciplined to turn that down. Mm-hmm. Mm-hmm.

Um, okay, cool. Uh, anything else you want to add, Marilyn, or, or questions for me? No, that's, that's it so far. Okay. We're gonna come back. We're gonna go through a couple of rounds you guys, 'cause we also have to go through Neptune and whatever. Um, let's have AIA go next.

So if, if I had to think back like 20 years, like this past 20 years, yeah. I, I mar Marilyn, I kind of felt where you were coming from. 'cause I had to take care of my grandma during COVID time. And so I felt like during that time, you know, I also was like, when are we ever gonna get to live our lives and stuff?

But, um. Once my grandma came to Oregon, which is where I am, but when we, when I moved to Florida and then I met my wife and, you know, I decided like I'm gonna go back to the car business and her be okay with me working those long hours. I, I think from when I was in Yakima to when I was in Oregon, the biggest lessons that I had to learn was like people pleasing.

And that was one of the things that even till this day, I, I'm still like, no, like I can't cave in because it's so easy to just give my customers everything and like, leave myself drained. So today, like I went, I went to work because it's, it's the beginning of the month and I wanna start the month right and end the month with not like, um.

You know, having to scramble for more deals. So, um, I went into work and today's my day off and I just, you know, I worked it. They left, uh, they didn't take delivery of the car, but I have to regulate my emotions constantly and I think that's one of the things that I couldn't grasp from in my head when I was working in the beginning because I feel like my.

My emotions would take over too much and I would be like frustrated and upset at myself and I would eat super unhealthy and we were starting diets every week and you know, just trying to get into that routine. But I think now that I have Fatima and Fatima's a really good counselor, even when I'm just like stressed, she is like, what do we need to do to get you outta that funk?

And like right now, we were driving 'cause I was a little upset at work and then I was like, you know what? I was like, I wanna listen to my childhood music. And we did. And we were just like listening to it and it just, it turned all of it around where I could have just came home and been like, grumpy and, you know, upset and everything.

The world is falling down, you know? So I think the things I wrote down was definitely managing my time. 'cause I used to go to work and hang out and now I, now that I'm married, I'm like, no, I can't just go to work and hang out. I have rent to pay, bills to pay. And they always say that the, the people with kids are the ones that work the hardest.

But I have to go against that because I feel like I may not have kids, but I definitely have big dreams to, you know, help out. My mom and my brother's always been like, I wanna retire my mom. And I'm like, yeah, but show it. Like, don't just say it. You know? So for me, one of the things that I'm working hard is being able to provide her, like, even if it's like.

$2,000 extra for her a month so that she doesn't have to stress. Like, that's one of my big goals. And also for Fatima's mom, that's, you know, to help them out and, and, but still have enough for

myself and not feel tight or not feel stressed. So I think that's one of the things that I've kind of like mastered to just from the help of Fatima is like, just if we can give, we can give, but like, let's focus on us first and what we need to pay.

Um, but I think, yeah, and then just like saying no to customers because, uh, you know, this lady, she, I spoke about it in the last one, but she just kept asking for more. Like she wanted the seat belts cleaned. She wanted the transmission check. She wanted, and I, I told them, I said. Look, if you guys wanna do all this, that's on you guys.

But if it's not making us money, like I'm, I'm not gonna promise anymore. So, um, definitely saying no and like working on setting those boundaries with customers where I'm like, Hey, there's none, nothing else I can give. You know, actually. Yeah. Sixth House rules, um, coworkers, customers. Employees, like people that you directly work with.

Yeah. So it sounds like it was a lot of boundary setting and this, this is kind of nuance, it sounds like there was a lot of boundary setting lessons with people who you perceived as like a source of income and you are over giving to them because in the back of your mind, you wanna also help your family.

So it's like this loop of like, let me do more and more and more for, you know, my coworkers, for my customers. 'cause I wanna provide for my family without realizing, well, well actually maybe. That's harmful to your health, and maybe you're not gonna make as much as you can because your energy's going to the wrong people, you know?

Um, so the, the sixth house I perceive as like the workaholic house. So when the Pluto transits, that doesn't surprise me that, you know, like you are so mired, like as, as much as like, you're like, Hey, I'm upset that I have to do like overtime. The thing is, you still did that for a long time, and that's because of the Pluto just being like, work, work, work.

Do this, do that. You know, think about your family, like all this stuff. That, that is kind of what Pluto does. You know, like, like I said, when it transit the fifth house, it kind of makes you really focus on like your craft, your, your, your work of art. Like you wanna create more, more, more, more, even though you know you shouldn't, even though like you're not really making great art like you wanna keep producing.

Same thing with the sixth house. It kind of works you like a workhorse. You, and now you're kind of like bitter about it. But what are the lessons there you, you think it can take with you going into your relationship house? Because this is a really important transit going to the seventh house. Um, it's the one that I'm personally not, not to scare you, but it's the one that I'm personal.

I would personally like to warn people. Right. All the Leo risings are going gonna go. Do you have any Aquarius placements? In, in what planet? Aquarius is in?

Like your Venus moon? Yeah. My Venus is in seventh and uh, I have Neptune, uh, and the moon on sixth South and then Ous Venus on the seventh in Aquarius. What do you have in the sixth house again? Sorry? The moon, uh, Aquarius, uh, the moon and Neptune.

Right. But what's it do? Oh, sorry, let me rephrase. Do you have anything in Capricorn? Do you have any Capricorn placements? No. No? Okay. All right. When did you get married? Um, about a year ago. 2021, right. Okay. 21, 22. 3 23, sorry. 23. She's just, she's listening to her book and she's like 20, 23. 20. December 15th, 2023.

And when did you guys start dating? Uh, April 4th, 2021. Nice. Okay. Yeah, four years, just recently. Yeah. Okay. Um,

so you have Venus in your seventh house, which is real interesting. All these major planets, if you have personal planets in that house, so for example, if Marilyn, if you have planets in the second house, if Katie, you have planets in the 12th house. Pluto's, when it hits your personal planets, you're gonna, the impact is bigger.

You're gonna really feel that. Um, so this is not, this is, this is not a prediction because it doesn't, it will, doesn't have to play out this way a Dania, but I have to talk to astrologers who will say shit like, oh, when Pluto transits your personal Venus, which is, which is gonna be you? Mm-hmm. That means like divorce.

Does it mean, does that mean that's gonna happen? No, that's just an interpretation. I don't know if you've heard of this before. I have. It's, it's, I've heard this. Yeah. Okay. I'm gonna tell you right now, it doesn't always play out that way. Mm-hmm. Especially since you're here and, and we're talking about it, it's definitely not gonna play out that way 'cause we're preparing for it.

Right. So.

The number one thing you have to watch out for is making sure the resentment and the anger does not manifest into your relationships,

because that's the big thing you pointed out from your sixth house transit, right? Like, man, I was working, I was working overtime for all these people, even if I love them. But now, as it enters your seventh house, the house of the other, you're going to perceive your partner or your boss, or anybody one-on-one as like, like a threat to someone who can take away your time, money and resources doesn't mean it's true.

It's how you're gonna perceive it as like power struggle. When Pluto hits the moon, the Venus, the Mars, it manifests as power struggle. In some cases it can show up as, um,

it can show up as your partner. Channeling these traits. So maybe they come up as like very controlling or domineering or whatever. Mm-hmm. But I don't really wanna get into like who does

what and who does what in these trends. 'cause you never know how it's gonna play out. To me, I am always more interested in how do we use Pluto to achieve mastery in that house.

So Marilyn's case is kind of easy, right? How do we tap into Pluto so that Marilyn gets what she deserves? Um, iia in your case, how do we tap into pow uh, power Pluto, the power of Pluto so that you show up as the partner that you need to be in a, in your business or marital relationship or whatever, without losing yourself.

Mm-hmm.

I am glad you're married. I'd be more concerned if you weren't. That's where I'm gonna leave that. I actually, um, I, I don't even know if I picked the right date, but we really rushed the marriage date because of the ology that I was calculating in the Chinese year that it was. Mm-hmm. So we thought that 23, 20 23 right, was the best year before we'd have to wait till the horse year or something, um, compatible to us.

Smart. Smart. I love it. This is how you should live your life. This is what I advise, so we do. Yeah. So for Marilyn and Katie, what she's basically describing is she probably looked at her Chinese zodiac ear and looked at what year is compatible. So if she's a horse, she wanna get married in a horse year.

If she's a dog, she wanna get married in a dog year, so on and so forth. Like, if you're a tiger, you don't wanna get, sorry if you're, yeah. If you're a horse, you don't, you don't wanna get married in a rat ear, like stuff like that. Um, same thing with your home by the way. I just wanna give you guys a heads up your home.

Look at what year it was built. Is it compatible with yours, Marilyn? You're trying to build a home. Don't build it in a year when it's not compatible with your year. Hmm, okay.

I lived in a couple of rat homes, really screwed me over 'cause I'm a horse, you know. So these are, so now like when I, I once had an artist way student like have a meltdown. 'cause she was like, if I try to apply all these things, you're telling me I'll never find the perfect home. And I was like, that's kind of the point.

The point is to look and look and look until it meets all your requirements. 'cause they exist. Don't settle. Okay. I've had, I've had someone tell me that I, Marilyn, you settle all the time. You settle. Don't settle. Yeah. Mm-hmm. But I will say New York, um, also has that energy too, where it kind of puts you in that lack mentality a little bit.

'cause everything is so scarce. Mm-hmm. So, um, yeah, I mean, I'm just gonna tell you guys right now, so, 'cause I think Katie and Marilyn are there. Where are you gonna Danya? Are you, where are you? Uh, Portland. Oregonian. Okay. Yeah. You're not on the east coast. Um, the Hindi priest that I'm attempting to work with, he straight up told me not, not just the Hindi priest, Hindi priest, feng Shui master, all these guys are like really big in their fields.

They have told me New York, Manhattan, but like all of East Coast pretty much, but especially New York, really, really toxic ancient energies. Like a lot of the homes are built on lands that are not good. Um, like really? Yeah. I mean that's why they have so many clients out there. Like my feng shui master flies out to New York all the time.

The Hindi priest in New York all the time. It's always a phone call from someone who's in a trouble disaster. It's all, it's because of the land. Mm-hmm. I just want you guys to keep that in mind. And I say this as someone who's lived there for 10 years, right. And whenever I met someone who was thriving in New York, it was, I was like, how is this possible for you?

'cause I can't figure it out. But anyway, I just wanna, anyway, we went on a little tangent, but, okay. Does that make sense, Danya? Like, you wanna make sure all the lessons that you've learned around boundaries, people pleasing, not overwork. See, another manifestation of this is that you overwork to a point where your partner says like, stop, I can't be with you 'cause you're working all the time.

Mm-hmm. So then you feel like you have to choose between work or love. That's kind of Vitas versus Pluto.

Um. When I was in Florida, I'm, I'm actually a tiger, but when I was in Florida, the east coast, I realized it was our enemy. It was founded in our enemy year, and I hated living there. So I only lived there for one year and decided to move back. But my mom's boyfriend did San Santoria and, um, he, he, yeah, he told me he is like, it has, it has, and it was weird because he was like, it has nothing to do with you, but your mindset is like off there.

Wait, who did like, Maria? My, my, my mom's ex-boyfriend did Santeria. Yeah. And then I was just shocked because my mom was like super Catholic and raised us super Catholic. Right. And I was like, how are you dating this guy? Right? I was like, I'm so scared. But, um. Yeah. And then Fatima didn't like him at all.

And then he would tell us things and we would be like, yeah, I don't think that's true. And we've been together four years now. But he was super like machista and I don't know how to say that. How do you say machista, but yeah, like chauvinistic. Yes. Yes. Was he practicing Santeria, like to put spells on people or like Marilyn, like to remove like Marilyn's friends.

Do you know which one? Which son? We could never figure it out. Right? We could never figure it out because he would be like positive, but then what he said would be like, so contradicting. So then me and Fatima decided not to talk to him anymore. Yeah. And my mom ended up breaking up with him, but my mom said that she healed him.

She, he healed her from. From like my, the trauma she had with my dad and stuff like that, that there was some actual spell cast on my dad, and that broke off my parents' marriage, so. Okay.

So it was, okay. So that's the thing about Santeria. It can be both good or bad. So he probably casted some kind of something on the father, but then No, he didn't cast it.

He saw it like he was kind of psychic or something, Uhhuh, and he said that somebody that lived with us cast a spell on my parents so that they can divorce. And he removed, he removed it from my mom because my mom wouldn't have any boyfriends after my dad for years. Right. And after that spell was removed, is your mom happier now?

Oh, she, she's, she's, she's so funny. She's living, she's living like she's 17, the girl, and she's in a relationship about. No, she's just single and, but she's just, I could tell she's happy and you know, she's always wanting to move out here, but I'm like, mom, you're not gonna like it, I promise. I'm like, it's just work, work, work here.

And I was like, and I just want you to rest and go home and, and retire. And she's almost done paying her house off. So I'm like, there's no point of you selling it to buy another one out here. Okay. Wow. I'm like hearing so much about Sanita. It's crazy. Yeah. Um, yeah. I'm glad you broke up with him. He's, he, I mean, I'm sure he did great things, but it also kind of sounds suss, so, you know, don't wanna get involved with that.

Um, but does it make sense to you how it's gonna impact you for the next 20 years? Hopefully you're aware of this dynamic with, um, we're gonna look at the, the Aquarius separately, but we're reflecting on the past 20 years. Right. So, okay. Um, Katie. Yeah. Um, so, uh, it's interesting when we started talking about your natal planets and where they are.

I have three planets in Capricorn in my 11th house, in my natal chart. Um, I have Venus, Neptune, and Uranus. Ooh. So you definitely have stories around that, don't you? Yeah. Mm-hmm. Um, my whole life, you know, my whole life from, you know, probably my adolescence, you know, 15, 16 years old, I've just never felt like I've fit in like anywhere, especially growing up where I did very rural, very Christian conservative.

Background that just does not align with like, where I am now. Um, and have really, especially in my family, not felt like I fit in like black sheet type deal yet. They love me, but we just, we are not the same. Um, and just kind of struggling to find, find that familial tribe outside of my own family, because that's where I have to find those, those needs getting met, you know?

Um, and then when it comes to relationships, power struggle after power struggle, like very, almost feeling like carmic relationships. Mm-hmm. Uh, really sucked, you know? Yeah. Mm-hmm. Um, but then again, and also like, I don't know if this ties in or not, but like you had mentioned about standing out within my peers, um, I, I work in advertising.

It's. So competitive and you know, that's been my entire life for the last 15 years. So it's, yeah, it feels like everywhere. It's just been kind of hard. Yeah. I, I don't, um,

I mean, I just, I don't, I want to debate with an astrologer about the, the Venus Pluto Conjunctions Transits. 'cause, 'cause Adonia has it, Katie has it, but they're in different houses. Right. And I am of the school of thought that when a Venus Pluto meets, or even when a Mars Pluto meets, yes, it might impact your relationships, but the flavor's different depending on the house.

So for Danya, it's like straight up in a relationship house. For you, Katie, it's more like in your social network house. Mm-hmm. Okay. Mm-hmm. Right. It's, it's. So, whereas an astro, some other astrologers might just tell you like, doesn't matter what House Venus political conjunction divorce done, it's like, I don't always really agree with that, you know?

Right. 'cause it could just be like, mm. Divorcing my social crowd. Exactly. Exactly. Right. E, exactly. So, um, and if it's a Venus Pluto Transit in your sixth house, it could be divorce with a coworker, right? Uh, Venus, Pluto conjunction the second house is divorce with an employer. You know, there's so many different interpretations.

I think the, whenever Venus, Pluto means, I think the, the bottom line, the story there is you versus the other. What you love versus the other. That's kind of all it is, I think. So it's really important to learn to, you know, really step up in your communication skills upfront, learn how to communicate, learn how to be attuned to your needs so that you can communicate and it doesn't create this weird power struggle underneath the surface.

Yeah, absolutely. And I think I. That definitely resonates because I, I've always been afraid to speak up, you know, abandonment wounds, whatever. Um, and I'm finally, it like finally this year, I guess stepping into like this, I don't give a fuck. Like, I'm not happy. Mm-hmm. Right. Right. I'm not gonna, I'm not, I'm not gonna try to fix your shit when I have my own shit.

Yeah, yeah. I'm not here to like carry yours for you, like I'm not. Yeah. So, so, um, so let's start with Katie again. If, if you guys go to your first link, now let's go through your Aquarius houses, because Katie, for you, PLU was about to enter your 12th house. Very interesting house tolu to go through. Very, very interesting.

I don't think I've actually talked to anyone. Wait, did I? I can't remember now. I mean, I know people who had Neptune go through, maybe I did talk to, anyway. What are some themes that you think it can bring into, well, first of all, backwards. Let's work backwards. What do you hope to get out of your Pluto transit through your 12th house?

Because remember, you guys, Pluto will give you gifts. It'll first make you suffer, but then it gives you a reward. So best case scenario, what does a suc a successful 12th house transit look like for you? Katie?

I mean, based on our conversation, b based on our one-on-one, I have answers, but I'm curious what you, what you think

Aqua's 12th House was about to go through it. I think yeah, embracing, like this says embracing spiritual practices, um, you know, the, the blend of technology or science is really interesting. Um. So I think for me, a successful 12 house transit would be really being grounded in my spiritual practice, even if it's different from everything I've grown up with.

Mm-hmm. And kind of like standing in that. Mm-hmm. And also, 12 House is the house of past lives, dreams, um, hidden enemies. So when Pluto transits that house, you might actually learn more about this family curse. You might actually learn more about your past life. You might, by the end of it, you're probably gonna have, um, your own spiritual practice that could be completed from like your families.

So to me, when Pluto goes through Aquarius, to me it's, it's also about, um, the truth. 'cause Aquarius rules a truth. So I want everyone to know that. The upcoming Pluto Transit is gonna show you more truth about who you are and what you really want. And for Katie, it's gonna manifest in a very spiritual way.

I feel like you're also gonna adopt like some, um, new age, like, you know, high tech spiritual project, like maybe like hypnotherapy or something new, new practices, new tools to like really further your subconscious work. I kind of see you doing that. Um, but from my experience, and this is more from speaking from Astrocartography, it's also where like you might, if you don't, if you don't get ahead of it, you might experience paranoia.

Oh, great. And I say that because um, I've chosen to live at places where Pluto runs to my 12th house. Don't ask me why. I just chose, I just chose it. And um, but I was also very confident that I'll manage it 'cause I've been through so much and I've learned so much. Oh no. Marilyn, you have to go. Do you think you can just, uh, be on, um, turn your camera off?

Oh, no, I guess you can't even hear it. Right. Okay. Well, I was hoping to go through Neptune with you, but you know, if not, then I'll at least catch you up separately. Yeah, yeah. Because I know that you are cap rising, so thank you. Yeah, of course. Thanks for joining. I'll talk to you soon. Bye. Um, so, so just, just keep, just keep in mind it's good to get ahead by, you know, deepen your spiritual practices because it does, it does rule psychosis, paranoia, all the, it, it's Pluto, it's gonna just muck up everything that's hidden and buried.

Yeah, I think, yeah, I can feel it kind of already. Um, I think, I think it actually started, I started feeling it maybe in December. This shake up, especially my spirituality. Um, and definitely I feel, yeah, and I'm in a hidden seven house and, um, so that's really interesting as well. Um, I'm also a little, just a little nervous for this transit 'cause I've Saturn in a, in my 12th house in my bedroom.

Okay. Yeah. Right. So you already have, you know, depressive tendencies baked into you. So Pluto might just like really activate that, um, for if this makes you feel any better. I personally think it's one of those things where it's one of those placements where it can be as good as you want it to be or as bad as you want it to be.

Like you have way more control over Pluto 12th house because if you get into meditation, if you get in, if you get a really great therapist, if you get a really good psychotherapist, if you get, um. If you have a good support system, this transit will be a breeze. Okay. Yeah. Like I, I go to therapy, I've yeah.

Have been meditating consistently since December, working on my chakras, like, and I'm here, so. Right, right. It's not like these other houses where like you are on, on the beck and call of like your employer, like, uh, you know, second, sixth, eighth, 10th. It's not like that. It's, it's kind of like me, myself, and I, it's that house.

Right, right. But that's the good news. Yeah. Um, I would also look into, are you familiar with Archangel Michael? I would look into working with Archangel Michael, like these deities. Yeah. That would be very, very helpful. 'cause you wanna pull in positive energies and put and put into your subconscious. Yeah.

Um,

interesting. Okay. So I guess what you're bringing into your 12th house from your 11th house lessons is. Basically to embrace, you know, what makes you different from other people, because that was your 11th house story, right? Like, just embracing, okay, like, I'm different. I don't need to belong to whoever.

Um, if you experience isolation, I'm not saying you will, but if you, if moments of isolation or loneliness comes up in your 12th house, it's important to remember why that's okay. Right? Yeah. You have to, you have to remind yourself like on some level, I chose this 'cause I can't be with all these people anyway.

Right? Yeah. And it's not because I'm wrong, it's just totally mm-hmm. I am. Yeah. Yeah, exactly. Um, Dania, so it's going to your, well, we already talked about this, but it's going to your seventh house. So transforming connections through equality. Can I ask something really quick? Yeah. Mm-hmm. I just wanna understand, when you say Pluto is entering an Aquarius, right?

Uh, on my birth chart, like it's, it's, it was Sagittarius, Pluto on the fifth house. How do I know just based on where Pluto is today kind of thing. And then how do I know where, which house it's on? If that makes sense. So, yeah. Yeah. So you have you, because you're Leo Rising, you have Aquarius seventh house.

I just know that by memory. Okay. The, the planet. Even if you have Natal Pluto and Sagittarius, that's what you're saying, right? Even if you have Natal Pluto in Sagittarius, there's a separate Pluto transiting in the sky right now, right? Because it's today, right? Like that's, yeah. Pluto and Sagittarius is when you were born, that's like a photograph, right?

When you were born, but now it's in Aquarius. This is just, there was astrological calendars that show where all the products are. Correct. And in early, in late December, early January, Pluto officially entered Aquarius and will stay for the next 20 years. 'cause it's a very slow moving planet.

So it's on my, so it's in my seventh house again? Yep. It's in your seventh house because you have Aquarius seventh house. Um mm-hmm. Okay. That makes more sense. So

for the next 20 years, it'll be mm-hmm. Oh, yep. That makes sense. Wow. So, okay. So if it's in my seventh house in Pluto. How, like, 'cause this is the whole reason I wanted to take the course and get married earlier. And the whole purpose of it is really to get ahead of it and learn so that you can protect what you have.

So you would just say like, uh, learn to communicate for my relationship with my other person. Right. Like, and just learn to set boundaries or communicate. Yeah. Learn to communicate and also learn to navigate power struggles like your needs versus her needs, your goals versus her goals. Gotcha. For the next 20 years, then it's all about me.

I'm kidding. I'm just kidding. I'm just kidding. It's about, yeah. I mean, it is about next.

Did you not learn a thing? Just kidding. Do you feel, do you feel this transit already Adia? Like, kinda like how Katie says she's already been feeling this transit since December. Have you been feeling the themes of this in your seventh house?

I don't know, because I feel like if anything, since we've moved to this place, like we've been really like understanding of one another and supportive of like her goals, my goals, and I'm really happy that she is. 'cause I feel like we just argued a lot when we're in the ninth house and now we're just in the second house and we're like.

Like right now we have this martini project that she's working on where she's gonna bedazzle it and sell it. But on the painting, 'cause I remembered your bunny painting. This one says 1980, and I was like, mm-hmm. That adds to a nine. I was like, you better decorate that and sell it because, 'cause like, you know, if that's what you wanna do, I'll support you.

But like, it has a nine in there and we don't want it in our house and Right. So we've just been, you know, very mindful and excited. So like, yeah, yeah, yeah. So, so the, so the good news is, and you're taking all the right steps, Pluto will make you better. That's the whole point. So by the end of the 20 year transit, you might also just become really good in your relationships, like, like really strong on your marriage and partnerships.

I think that's what we're definitely working towards is just being more like, considerate with each other and, um. Uh, I don't know. I think, I think we've been almost in a little honeymoon phase again and just kind of working on like her needs and my needs. So like today, I, uh, because

one of, I think it was Genevieve or I don't know who else I had the meeting with, but they were saying like, I need to learn to relax because I said, why, why?

When I was drinking and doing drugs, like was I like, so like I manifested things more quicker to me. I said, and now that I'm not doing anything, I said, I feel like it's so much harder. And they're like, it's 'cause you didn't care. And so then they're like, try doing something where. You know you're a childlike again, so we're gonna do slime today.

That's our activity is just to make slime and pick little things. 'cause I like pimple popping. It's this weird thing. So I'm just gonna do slime and pop the things out of there. So Nice. Definitely trying to practice like childlike things so I can relax and not care and have fun and yeah. That's why today at work, I just was like, you know what?

Screw it. I'm going home. And they were like, why you can sell another car? I was like, Nope. I said, I'm done. I said, my wife is outta work. I'm ready to go. We're hungry and I don't have to be here. Mm-hmm. You know? Mm-hmm. That's awesome. Um. Yeah, I definitely think the, the Pluto going through your sixth house, that once again create this overdrive of you like not being able to relax.

So you're right, that is the, the key to your successful seventh house transit is to relax a little bit, right? Because, 'cause that's how you show up as a better partner when you're more like embodied and chill and, you know, present all those things. So I would, I would maybe also journal like all the kind of damages that the Sixth Hospital Transit did because sixth house is very work, seventh has very relationship.

So maybe you overdoing work is not gonna very help be helpful in your relationship. It's, it's good to make note of that.

Um, okay, let's quickly do Neptune, you guys, and then wrap. So for Katie, this is in her second house, right? It's about two. Transit your second house. Okay. We kind of talked about that. Um, and for aia, it's about to transit her

if anyone knows popcorn style answer, but it looks eighth house.

Ooh, wait, no. Nine TAs. Ooh, nice. Oh, wow.

Huh. Okay. Interesting. Actually, I Dania, the last, um, the last, did you by any chance start making more money in the last 12 years?

Within the last 12 years of Danya, did you by any chance, start to become financially stronger somewhere along the way, or smarter? Um, I think so. I think, I mean, I've, I've known that sales kind of makes me money, so I always go back to that. Um, but I think learning, like shutting up and listening to like the people that are actually top sales, I've learned and implied what they're telling me now, so I feel like it's made me more money.

Hmm. Okay. Good to know. All right. Um, and then I've manifested random amounts, right. Just here and there, which was weird, but it was nice. I I'm not gonna complain, right? You're like, I'll take it. Yeah, take it. I won't say no because you had your Neptune transit in your, in your eighth house. That's why. But, um, anyway, uh, okay, Katie, so same thing.

Neptune just left your first house. Congratulations. Although, I dunno that Neptune to the first house is like, that is the worst thing ever. I don't, I don't think that's quite it, but it does make you kind of question who you are, like, kind of question your identity. So you probably went through a lot of identity shifts in the last 12 years.

Oh, a hundred percent. Mm-hmm. Um, and

did it by any chance also make you put people on a pedestal? Yeah. Okay, so now it's about to go to your second house. Well, Neptune's a, you know, a very creative planet, so it could kinda like what Adya said 'cause right, and Danya for her, it went through eighth house just recently for, it's about, it's about to go through your second house.

So, like how Adya said, right? You can get random windfalls, you could get really creative with the work that you do, get very creative projects and make interesting money. But the shadow side of this obviously, is to be impulsively spend. Mm-hmm. Or to be reckless or, you know, struggle with your, with your self worth and not advocating for what it is you need.

Okay. Pluto is more about power struggles, right? But Neptune is more about doubts. So when it's hitting your money homes, you might be questioning your worth. Okay? When Neptune transits your relationship houses, it makes you question. Whether or not you're worthy of the partner and you put them on a pedestal, but when it's your money house, it's your worthiness in relation to your money.

So, um, so what are some things you've learned from your first house transit that you can bring into your second house so that you can protect yourself from falling into being financially, you know, distraught, although I don't think it will happen, but you know what I mean. Yeah. Um, I think one I've really learned that I am worthy of everything that I want and I'm deserving, especially when it, especially when it comes to relationships work.

Um, and I do love my job. I'm, I'm good at my job, um, but also I'm gonna fight for what I want a little bit harder, I think, at work. For the projects, for the promotions, all that. Um, but I also, knowing that this, there's this shadow part, I need to be disciplined. I have to hold myself accountable so that I, that so I don't, you know, frivolously spend or, you know, especially in this climate, I need to save my money.

Yeah. I also think with the, with the Neptune coming out of your first house, going to your second house, I think there's something also here about not taking everything at face value and double checking the details. Hmm. So when a new co, when a new employment contract comes

in, or when, like a new whatever, someone hands you the papers, you know, just gonna be like, oh, this looks great.

Because Neptune can over promise. Right? You don't just like say yes immediately. Like, you like triple check the details. Got it. This could be even like your, your, when you buy a home or when you rent a new apartment, like, you know, these like contracts, housing contracts, plumbing, contracts, anything that involves money.

Got it.

Yeah, that makes sense. And, and if you get those right, if you get those details right, you can actually really benefit from this transit. 'cause Neptune, like I said, is a very creative planet and it can be lucky. You just have to make sure you don't like, fall into like those weird, like scams or loopholes.

Right, right. Yeah, that makes sense. Um, does, does my, my moon is in Aries, so does that affect it at all? Uh, you might become more inspired to make art and to express yourself.

I'm not too worried about it. I personally don't like Moon Pluto Transits. Uh, moon Saturn transits. I don't like those. Moon, moon Neptune. I think it's gonna be okay. Okay. Like you might get a little bit carried away with feeling too optimistic, but I don't think that's a bad thing, you know? Yeah. Um, it's kind of funny sometimes astrology is so literal.

I know someone who's doing really, really well in the alcohol business and he has Neptune in his second house, like Natally. 'cause Neptune also rules drugs, booze. Oh, interesting, interesting. Yeah, because I work in the pharmaceutical advertising. Exactly that. So I'm, I'm thinking it may even just work out for you, you know, maybe if you pick jobs, keep picking jobs in that industry.

Yeah. Yeah. Interesting. Yeah. And I also know someone who is a gambler, like a professional gambler with Neptune in the second house. Wow. They do really well. So it's, it's never, it doesn't have to be a bad thing. It's just about like, let's focus on the strengths here. Right? Yeah, no, that makes sense at all.

Isn't that kind of funny? Yes.

It's really funny what works for one person doesn't work for the other. Um,

so the homework here is to really pay attention to you. We are not gonna have enough time for this, but the homework is to really pay attention to you. What did I learn from that previous Neptune Transit.

The lore is amazing. When you talk to people who experience Neptune going through Seventh House, the lore is incredible. It's really, it's really shy. So, um, I think y'all avoid, but I donya, I am

curious to hear how your Neptune Transit and eighth house was for the last 12 years. So, wait, maybe I didn't give you guys this.

My apologies. Uh. So my Neptune was in the eighth and now it's going into the ninth. Yep. So I just dropped the Google spreadsheet for the Aries Transits. But yeah. How was, how was that eighth house? Because eighth house rules, taxes, death, other people's money, investments. Um, well, I feel like the car accident, definitely it was, I was really bittersweet because I loved that car, but then when I saw the money I was like, forgot all about it.

You know, just really happy that came through. And, um, but I think that was one of the things where we just kept getting money from this car insurance stuff. And I was like, well, like, I guess, and it would be in like chunks, like it was like 11,000, 28,500. And most of the things that like Fatima wanted, I was like, you know, have it, like, you know, we have the, we have the money, so I.

I felt like she helped me manage it way much more longer than I thought I could. But that's why now I've told her, I'm like, I want us to put it in our money in a joint account because I want us to really, you know, grow together. Mm-hmm. Um, but you know, when in, when I was just starting the car business, um, I did this like, um, what is that marketing, what is it called?

MLA or Market Marketing. Oh, uh, MLM or something. Most of them market. Yeah. I. I, I did that. And they really like brainwash you and like believing, you know, you're gonna be somebody. So I, I mean, every day I woke up and I would sing this Bad Bunny song and be like, the money rains on me. And like, and they would, and it just, I was so delusional and I was like, it just rains on me all the time.

And, and then I would be like, trip pubs and dollar bills. Like, you know, I just would film my music with like, being so delusional of attracting that money and deserving that money that my brother would be like, I don't know how you do it, but can we get this next? And then I was like, sure. And you know, but I definitely felt a blockage when I was in Florida.

Fatima definitely was like just there, even though it was our first year, I'm so thankful for her because she just was like, get out of that funk. Get out of that funk. And like, we moved out here and. It was hard the first three years because we were in that ninth house. And I feel like I realize that now, but now I feel like I'm back in that horse again where I'm like, like, oh, I put my alarm and I said, uh, my alarms three alarms a day.

And it says, celebrate you made $833 today three times a day. And that's because I wanna hit 300,000 this year, and I want to like really be delusional about making that amount of money. Yeah. So I, but I also need to find that balance of like, okay, if. This is gonna be my first income, you know, car sales. I need to find a second one to be creative, and then maybe a third one.

But I'm mm-hmm. I'm doing those homeworks where I, I'm trying to figure out what, what I, what I need to do, you know, what's fun for me and, you know, yes. And you know, with Neptune

going to a ninth house, there is something about teaching, I think we kind of talked about that, but ninth House is like higher education, philosophy, travel.

And when Neptune goes through that, you're going to feel compelled to kind of share your inspiration with other people and expand your mind and continue your learning. So you might, it's kind of funny how Neptune and the eighth house played out for you, but now as it goes through your ninth house, you might be more inclined and more inspired to share, teach, create.

Your spirituality will expand. You might teach manifestation. You never know. Yeah. I'm definitely open to like anything. And even like hearing Katie's stuff, I'm like taking notes of her things. 'cause I'm like, you never know. You know? Like, what if I have a friend out there that's going through what Katie's going through and I just need to be like, girl, it's gonna be fine.

Katie in the East coast and she's, she's gonna do great. Like, you have no idea she's already in the program. It excites me to see where everybody's at in life because I think it's, it's not forever. And I think we're definitely ahead of the game by trying to learn this stuff and Oh, a hundred percent you, you definitely got ahead by moving too.

Yeah. That was smart. That was really smart. Yeah, it feels good for sure. Um, can I show you guys my place? Yes. Really quick. It's a little dirty right now, but like, look at this. Is this Oh wow. This is Fatima's decorations. Uhhuh, and it's, there's Fatima, sorry. Oh, and then this is our, our big couch. But I mean fat.

Oh, I love the Cal ceiling. Oh, yeah. It's, it's huge. And we just got this Uhhuh for the wall, but like, oh, you know. Yeah. I, I'm really, I'm really proud of her for doing all this. Looks really great because it's, it looks great and all that, all that light. That's amazing. Mm-hmm. Yeah. Well, she definitely likes tall ceilings in, after we had our apartment with the first tall ceiling, we're like, yeah, we, I, and we wrote down, what do we want in our next place?

And we're like, more ceiling, more light. We've gotten sick a couple times, not exactly bad. And now that we gotten sick a couple times, we're like, in our next place, we've gotta have a bathroom next to our. Bed. Bed because we struggle like going down the stairs and coming down to the bathroom. So it's fun manifesting with her.

'cause I'm just like, wow, look at us. We're growing. That's so cute. You guys are so cute as a couple. Thank you. Love it. Um, okay. So do you guys, I think you both do, but hopefully everyone feels, have a greater awareness of what happened in the past 10 to 20 years and how to be a bit different moving forward.

Right. To channel the higher Tums, Pluto and Neptune Pluto destroys, but it'll make you more powerful in that area. Neptune can be confusing, but you can also make it work for you in a very creative way. I, I do have one more question if you have time hygiene? Yes. Um, now that I'm looking at this, the list of the, that you sent us.

Yeah. Um, and the second house. Says, you know, innovating ways to align financial growth, and then like, trusting your instincts to build resources through bold, inspired action. Um, I've never been like an entrepreneurial, I'm like, I don't wanna be the boss of anything. Uh, like, you know, like the top boss, I don't wanna do that.

Um, but like two weeks ago I had like this random idea come to me that's just been kind of like sticking with me in like a business like offering. And I, I'm like, is this, you know, that aligned inspiration or is it a pitfall? If it, if it makes you excited, there's something there. Okay. Okay. And the good news is you never have to be attached to how it plays out.

It doesn't matter. The, the key is for you to be like, this sounds cool. Why don't I just try it? Okay. That's energy. If you're, if you're excited about it, that's energy right there. It's waiting to be like sparked. Okay. Yeah. Okay. Okay. And you broke up, you bring up a really good point, which is the Neptune through Aries Transit.

Just in general? Just in general for the collective. It's a very innovative time because Aries is actually kind of a pioneer. So when Neptune is translating whatever house in your Aries house, you're going to feel more pioneering in that house. Like, and it may not lead to making money, but you're definitely going to have a breakthrough.

You're gonna co, you're gonna create something that solves issues for other people. That's a little gotcha. That I think most people like don't understand. So, um, so you might, I I wouldn't be surprised if you actually pick up some freelance gigs, Katie, to, to start out Yeah. Within the pharmaceutical industry.

Mm-hmm. Yeah, that makes sense. Doesn't it hurt to make extra bugs here and there? You know, until you develop your, establish your own agency, you never know. Yeah. Yeah. So, cool.

Um, you can also, you never know, you might also work with psychedelics down the line, you know, legalize marijuana, you know, shrooms, all these things are becoming more and more, it's more, uh, that's gonna really also help with your Pluto Trans in your 12th house. Yeah. That's interesting. I, yeah. To make that connection.

Yeah.

Interesting. I actually think like Iowa, sc, plant medicine, all this stuff is gonna become very mainstream or the next future. So they're gonna want people who can do advertisements around that. Mm-hmm. I'm just saying, I'm just,

but thank you. Thank you. Thank you girls. Yes, thank you so much for your time and I'll see you guys next week. Sounds great. Shoot me any emails, even if I'm slow to respond. Eventually I'll get to you, so Okay, bye. Take care. Thank you. Bye.
